provides crucial lessons in process safety operations drawing from 100 global case studies written from an operator's perspective process operations safety provides valuable information and education on the fundamentals of process operations safety by providing

background on process safety and key leading operational management and equipment failures that have led to catastrophic process safety incidents including loss of life written by an expert with more than five decades of industry experience this book enables readers to learn how simple jobs that they perform every day can lead to catastrophic safety incidents without proper caution protocol and attention a self learning quiz is provided near each chapter s end with answers to all questions provided in the appendix a listing of additional resources or reference material many with internet links is also included at the end of each chapter readers will find principles of process safety properties of hydrocarbons vapor cloud explosions vce and boiling liquid expanding vapor explosions bleve most frequent causes of significant process safety events in refining and petrochemical industries causal factors in over 100 global case studies of operations and incidents divided into thirty five subchapters with several examples for each explaining what happened and what could have happened key lessons learned written in simple terms using descriptions without jargon or complicated formulas process operations safety is an essential learning resource for petroleum refining and petrochemical plant operators line supervisors and critical support staff with field responsibility such as process and mechanical engineers along with advanced students at community and four year colleges and technical trade schools taking a process operations course

ludwig s applied process design for chemical and petrochemical plants incorporating process safety incidents fifth edition volume one is ever evolving and provides improved techniques and fundamental design methodologies to guide the practicing engineer in designing process equipment and applying chemical processes to properly detailed hardware like its predecessor this new edition continues to present updated information for achieving optimum operational and process conditions and avoiding problems caused by inadequate sizing and lack of internally detailed hardware the volume provides both fundamental theories where applicable and direct application of these theories to applied equations essential in the design effort this approach in presenting design information is essential for troubleshooting process equipment and in executing system performance analysis volume 1 covers process planning flow sheeting scheduling cost estimation economic factors physical properties of liquids and gases fluid flow mixing of liquids mechanical

separations process safety pressure relieving devices metallurgy and corrosion and process optimization the book builds upon ludwig's classic text to further enhance its use as a chemical engineering process design manual of methods and proven fundamentals this new edition includes new content on three phase separation ejectors and mechanical vacuum systems process safety management hazop and hazard analyses and optimization of chemical process blending provides improved design manual for methods and proven fundamentals of process design with related data and charts covers a complete range of basic day to day petrochemical operation topics extensively revised with new materials on non newtonian fluids homogeneous and heterogeneous flow and pressure drop ejectors phase separation metallurgy and corrosion and optimization of chemical process blending presents many examples using honeywell unisim design software developed and executable computer programs and excel spreadsheet programs includes case studies of process safety incidents guidance for troubleshooting and checklists includes software of conversion table and 40 process data sheets in excel format

the use of hazardous chemicals such as methyl isocyanate can be a significant concern to the residents of communities adjacent to chemical facilities but is often an integral part of the chemical manufacturing process in order to ensure that chemical manufacturing takes place in a manner that is safe for workers members of the local community and the environment the philosophy of inherently safer processing can be used to identify opportunities to eliminate or reduce the hazards associated with chemical processing however the concepts of inherently safer process analysis have not yet been adopted in all chemical manufacturing plants the use and storage of methyl isocyanate mic at bayer cropscience presents a possible framework to help plant managers choose between alternative processing options considering factors such as environmental impact and product yield as well as safety to develop a chemical manufacturing system in 2008 an explosion at the bayer cropscience chemical production plant in institute west virginia resulted in the deaths of two employees a fire within the production unit and extensive damage to nearby structures the accident drew renewed attention to the fact that the bayer facility manufactured and stores methyl isocyanate or mic a volatile highly toxic chemical used in the production of carbamate pesticides and the agent responsible for thousands of death in bhopal india in 1984 in

the institute accident debris from the blast hit the shield surrounding a mic storage tank and although the container was not damaged an investigation by the u s chemical safety and hazard investigation board found that the debris could have struck a relief valve vent pipe and cause the release of mic to the atmosphere the board s investigation also highlighted a number of weaknesses in the bayer facility s emergency response systems in light of these concerns the board requested the national research council convene a committee of independent experts to write a report that examines the use and storage of mic at the bayer facility the use and storage of methyl isocyanate mic at bayer cropscience also evaluates the analyses on alternative production methods for mic and carbamate pesticides preformed by bayer and the previous owners of the facility
